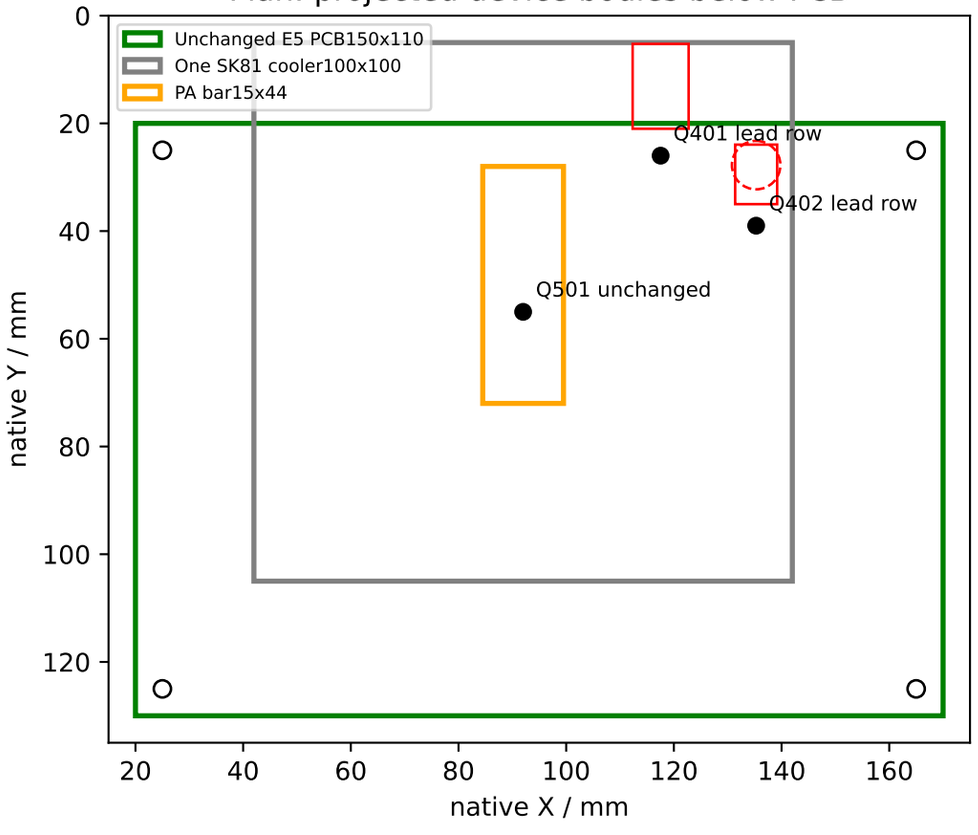
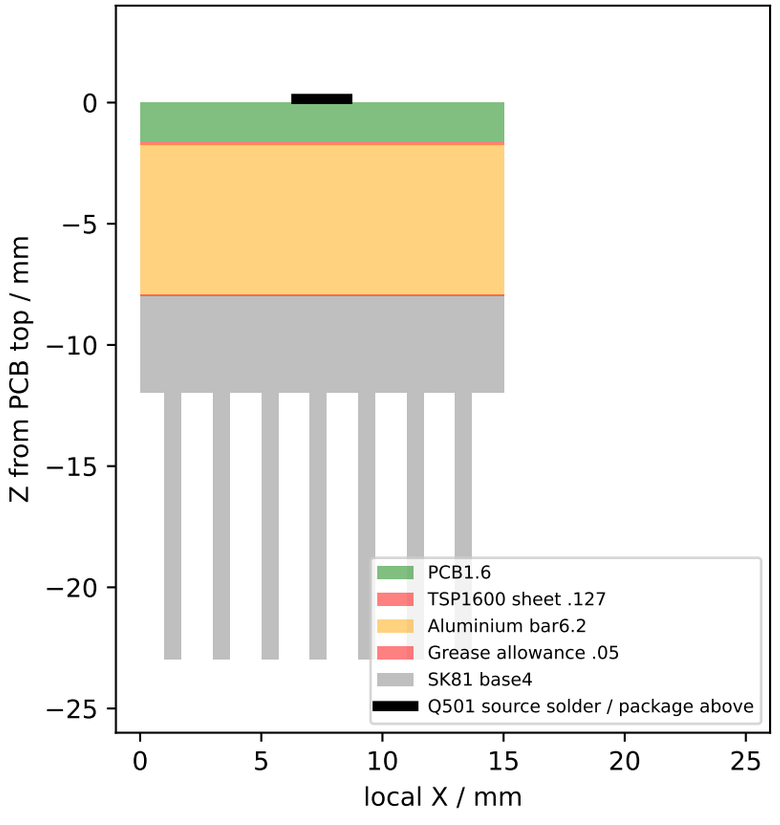
M5B-E6 FEASIBILITY CONCEPT — HOLD — NOT native KiCad / NOT a drilling template

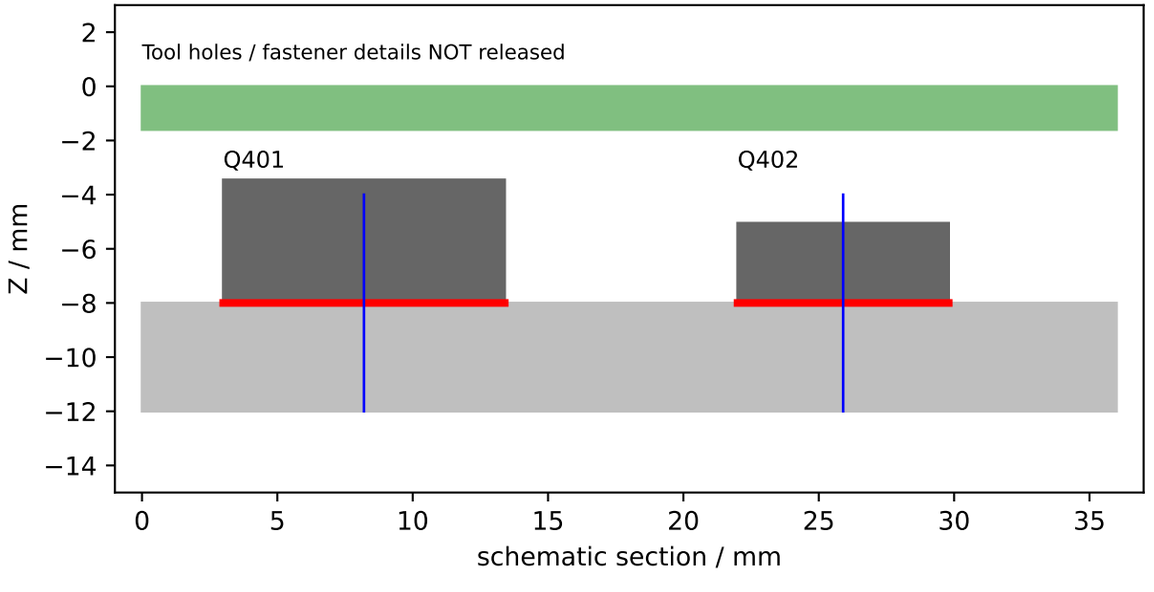
Plan: projected device bodies below PCB



Q501 stack: interface/source resistance retained



Tab plane concept; insulation under each live tab



Single independently supported structure

SK81 indexed mass214g; bar11.05g.
Hardware/guard mass not closed; assembly245–270g estimate.

Q501=GND; Q401=VPA; Q402=MOD_SINK.
Mica + insulated fasteners required on both live tabs.
Source-sheet contact/thermal path remains OPEN.

Guard: shade, ventilation, raised>=15mm, no foliage contact. No outdoor or fire qualification claimed.

All package shapes are simplified envelopes.
No E6 footprint, slot or machining drawing is released.
